Grade 0 Newsletter – February in Review

Happy February! We were only able to be in school for 2 weeks but we were still able to get a lot done!

In English Language,

We have been continuing to work on our new sight words. Students were also introduced to groups to help practice words. They loved being able to be independent!

In Mathematics,

We practiced addition

and subtraction with single and double digits. Students also were put into groups to practice their addition-like the sight words.

In Social Studies,

we were reminded of the importance of washing our hands. We also talked about importance hygiene and why we need to keep ourselves clean.

In Science,

we had our Insect Week! We were able lucky enough to

have the ladybug as our main insect to focus on. We learned all about it's life cycle, body partys and some interesting facts!

We also had our LEGO

exhibit field trip this month! Students loved being able to look at elaborate structures built completely out of legos!

Happy February!

Miss Sara

Pictures, pictures, pictures!
