

Grade 2 Newsletter – February in Review

Dear Parents,
I hope you had a wonderful and relaxing winter break.

Although this month has been pretty short, we still had the opportunity to participate in many exciting events at our school such as the Insect Week!

In Grade Two, the students have been learning all about butterflies. They made dioramas and fun butterfly crafts using

paper plates and paint. The students also made lap books about butterflies and watched videos about the butterfly cycle.

During the insect week, the students also visited the Forest Education Center in Celestynow which was great fun!

In mathematics, the students participated in multiplication center activities and did a great job solving problems in groups.

Happy February!

Miss.Sandra
