

## Grade 3 Newsletter – April in Review

Happy Spring Everyone! Thank you for your continued support at home with learning how to use Google Classroom/Google Hangout. We survived the month of April through online learning and it has been great!

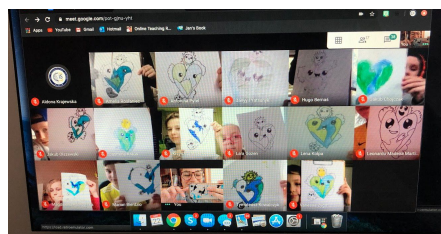

In Language, we started Unit 4 “Great Ideas”, and discussed the question “What are some great ideas that make our world a better place?” We love this question because it really started up interesting conversations about great inventions. We also are learning new vocabulary; instead of spelling words, students are introduced to new vocabulary and work with the new words each week. This week’s topic was sports!

In Math, we have been working on means of measurement with distance and length such as meter, kilometer, grams and kilograms. We also had our knowledge check for our previous unit which was another form of measurement with weight and volume (liter, milliliter, gram, kilogram).

In Science, we have been learning all about storms- specifically hurricanes and tornadoes. We have been comparing the two and discussing which would do more damage. We were pretty split as a class. I wonder what you guys think! We also talked a bit about Earth Day which was on 4/22.

Pictures, pictures, pictures!

In Social Studies, we continue to learn about the amazing country of Canada. We have been learning about Ontario, and what its land has to offer to its country and the rest of the world. We discussed what deforestation is and talked about the pros and cons of this process.

Grade 3 had a chance to earn a pajama party in honor of them having a good month of online learning. They continue to work hard and complete assignments during class. We have also been knocking it out of the park with our show-and-tell projects. They are doing amazing! Thank you again for the continued support.

XOXO  
Miss Sara
