

## **FOREIGN LANGUAGE TEACHING REGULATIONS AT THE INTERNATIONAL SCHOOL**

### **PREAMBLE**

To meet the dynamically changing needs of modern youth, and thus your expectations, after an in-depth analysis of the education system and observations of how it functions within the walls of our school, we present you the organization of foreign language teaching at the Primary International School.

In younger grades (1-3), we provide children with French as a second foreign language. Our school, being a school that simultaneously implements two programs, for obvious reasons chose this language as a certain complement to the implementation of the Canadian program.

Starting from the fourth grade, children enter the next stage of education, which brings new challenges and requirements. Due to various preferences, predispositions of children and certain cultural conditions, for many of you French seemed to be an insufficient choice in our offer. We, as a school, also had a need to expand our offer. From grade 4, we leave you the choice of a second foreign language - Spanish taught from the beginning or continuation of French. Our school also offers learning German for students who continue their German-language education and are graduates of other schools, and joined our school in later classes. The choice of language in class 4 is the final choice up to grade 8. Each of these three languages carries cultural richness, phonetic, lexical and syntactic diversity. The decision is yours!

### **RULES OF ORGANIZING CLASSES IN MODERN LANGUAGES**

1. Teaching of French and Spanish is included in the Tuition Fee.
2. Choice of the language declared in gr. 4 is the final choice until the end of the education in the International School.
3. From grade four there is a possibility to change the learned language from French to German only at the advanced level corresponding to the number of years of education in the school.
4. Teaching of Chinese, Russian, Vietnamese, Ukrainian or other languages is connected with additional payments and is governed by the separate individual annex concluded with the parents. Teaching languages which the school does not offer in the standard offer depends on the real capabilities, in particular, is associated with an employment of teachers with teaching certificates.

**DECLARATION OF SECOND LANGUAGE CHOICE FROM GRADE 4  
IN THE INTERNATIONAL SCHOOL**
