

## Grade 0 Newsletter – March 2021 in Review

Introduction... March began pleasantly, but ended unpleasantly as we were again in quarantine and once again having online lessons. I am looking forward to a time when we don't have to worry about such things and can remain in school for in-person learning.

In English Language, we completed learning all of the letters of the English alphabet. We also continued to work on learning sight words; some students progressed to the next level of sight words! When we return to the classroom, we will progress monitor again to see how students are progressing on their sight words. In April, we will be learning about poetry and writing simple poems.

In Mathematics, we continued to work on our addition skills, graphing, recognizing 2-D and 3-D shapes, and continuing patterns.

In Social Studies, we learned about the parts of our bodies and had fun playing Simon Says to practice identifying body parts.

In Science, we learned about the three states of matter: liquid, solid, and gas. We made ooblek, a non-newtonian fluid. If you would like to make ooblek at home, here is a website that shows you how, <https://www.instructables.com/Oobleck/>. You can also watch some videos about ooblek here: <https://youtu.be/RIUEZ3AhrVE>,

<https://youtu.be/69Z-v8LNy3I>.

In Art, we made leprechaun hats for St. Patrick's Day. We again used Art for Kids Hub on youtube for fun drawing activities: <https://www.youtube.com/user/ArtforKidsHub>. We also did an activity called Scribble Art.

Happy March!

Ms. Sue

### IMPORTANT DATES:

12 April 2021 online parent meeting

# Pictures, pictures, pictures!
