

March

Grade 2 Newsletter – March 2021 in Review

Introduction... March started out pleasantly as we were in school and having in-person learning. But, midway through, we were back to online learning. ☹️ I look forward to the day when we don't have to have online lessons again!

In English Language, we continued learning and improving our written and oral grammar skills through daily language practice. We also continued spelling lessons and writing sentences with the spelling words. We read the book, "The Titanic...Lost and Found" and completed activities related to it. We then began reading the book, "National Geographic Kids Titanic" on Epic Books

(<https://www.getepic.com/app/>). On 2 March, we held our classroom Spelling Bee and then the school Spelling Bee on 9 March.

In Mathematics, we began a unit on multiplication. When we went to online lessons, the learning continued with Khan Academy (<https://www.khanacademy.org>). When the students finished their assignments on Khan Academy, they were able to work on Course Mastery (either Grade 2 or Grade 3) for practice on skills and concepts previously learned or new.

In Social Studies, we continued learning about the world around us through the use of the CCC book and Google Earth.

In Science, after finishing our study of the Water Cycle, we began a study of Simple Machines. While online, we utilized BrainPop and BrainPop Jr. to facilitate this learning.

In Art, we expressed our creativity through an activity called Scribble Art.

Happy March!

Ms. Sue

IMPORTANT DATES:

13 April 2021 online parent meetings

Pictures, pictures, pictures!
