

October

Grade 8B Newsletter – October in Review

Introduction...

Happy October !! The Canadian program teachers are presently preparing for a very eventful and dynamic Halloween much fun will be had by our school community and it is the perfect way to end our very successful month of learning and personal development.

In English Language,

We have been examining the main idea from our keystone books on the benefits

of facing challenges and developing resilience in our lives. We have been writing personal reflections and have begun lessons in narrative writing I am pleased to tell you that we really have many talented and creative writers in the class. We are also well into way with our class novel.

In Mathematics,

We have been studying square roots, cube roots and right angled triangles. We will begin weekly math

evaluations to better support the students with their primary math program.

In Social Studies,

We have looked at the future of sustainability of human settlements and what aspects need to be considered in urban planning.

In Science,

We have furthered our understanding of cell theory and the function of the organelles in cells. We have also can distinguish between diffusion and osmosis.

Pictures, pictures, pictures!

Happy October!

Mr. Joseph Sullivan
