

December

Grade 1 Newsletter – December 2021 in Review

Introduction...

December was a month of both in-person and online learning. Even though our learning environment changed, we continued learning!

In English Language, we learned about Christmas traditions around the world. We also continued to work on our reading via kidsa-z.com.

In Mathematics, we learned some addition and subtraction strategies and continued to improve our computation skills with addition and subtraction. We also played some games with addition, such as Around the World and had addition team races.

In Social Studies, we began to learn about

geography and tools used in geography.

In Science, we continued to learn about the 5 senses. We learned that the skin is the largest organ of our body. We also learned that through our sense of touch, we can tell if something is rough or smooth, hard or soft.

In Art, we drew and colored Santa's Workshop, and learned to cut out snowflakes from paper. We did not have art lessons while we were online.

Happy December! I wish you a very Merry Christmas and a Happy New Year!

Ms. Sue

IMPORTANT DATES:

23 December – 31 December 2021 –

Christmas break

3 January 2022 – Class resume online
