

# November

## Grade 6 Newsletter – November in Review

Introduction... November has come and gone and we are continuing to work hard. Students have had a chance to work both in class and online this month and they have adapted well to both scenarios.

In English Language, we have finished our short story project. Students had the opportunity to write, illustrate, and create their own short stories. Many took this opportunity to write

about something imaginative and creative. I was very impressed with the final products.

In Mathematics, we have practiced finding the surface area and volume or both regular and irregular polygons. Students are encouraged to practice finding the surface area by looking at the nets of different 3D shapes.

In Social Studies, we are reading about different

official and unofficial symbols of Canada and understanding how they impact the Canadian identity.

In Science, we are well underway in the second unit which covers living organisms. We have looked at the organization of the kingdoms are taking a closer look at how living things are grouped.

Happy November!

Ms. Kepa

## Pictures, pictures, pictures!
