

February

Grade 5 Newsletter – February in Review

Introduction...Welcome back after the winter break. I hope everyone had a lovely time with their families and loved ones. We are back in the classroom and beginning the second semester in full force. Students are excited to be together and very active in the classroom.

In English Language, we began a new unit in the Cornerstone books, Technology in Today's World. We are examining how

technology has made our life easier and how anyone can be an inventor.

In Mathematics, we are starting our unit in geometry and studying polygons and 2D shapes. We are looking at angles and different characteristics of different shapes and how they relate to each other. Students are using different math tools in the classroom, like protractors, in order to construct shapes.

In Social Studies, students are looking at the rights and responsibilities of Canadian citizens.

In Science, we have begun looking at energy, forces and structures. We have also talked about the science project due next month and reviewed concepts from the start of the unit.

Happy February!
Ms. Kepa
