

March

Grade 8A Newsletter – March in Review

Introduction...

I hope everyone is enjoying the extra hours of daylight and warmer weather. The transition into spring has been most beneficial to your children as we have been able to incorporate outdoor activities into their learning experiences. The physical activities and added vitamin D into their routines has contributed to an added positive energy for learning.

In English Language,

We have been examining the importance of home, family and belonging in unit four of our Keystone books and I have enjoyed learning more about Polish customs from the students. The students recently completed a project that expanded on the cuisine they were raised on. Furthermore, the students also began work on a T.V news presenting project which further developed their

listening and speaking skills. In Mathematics, We learned how to calculate the surface area and volume of cylinders as well as the difference between supplementary, complementary and alternate angles. In Social Studies, We created campaign posters and slogans for confederation era candidates in Canada. In Science, We looked at the functions of a watershed and possible solutions to the future water crisis. Happy March!

Mr. Joseph
