

April

Grade 6 Newsletter – April in Review

Introduction... April showers will bring May flowers, or so we hope. While the weather has been all over the place this month, we have been hard at work with several projects and assignments already behind us.

In English Language, we have finished up unit four by writing and illustrating our own fables. We continued writing practice through several short assignments and began

unit five with reading a play.

In Mathematics, we learned about coordinate systems and reviewed our prior knowledge from last year. We worked on a secret message project and began patterning and simple equations.

In Social Studies, we continued looking at different NGOs and other organizations in Canada that have an impact around the world and learned a little bit about the Greenhouse Effect

and what role Canada is playing in a cleaner future. Students showed mastery of material during a test.

In Science, we started our unit on electricity and did a lot of reading and information gathering before experimenting with electrical circuits. Students tested out different insulators and conductors.

Happy April!

Ms. Kepa

Pictures, pictures, pictures!
