

Grade 0 Newsletter – May in Review

Dear Parents,
I would also like to wish all the moms out there a Happy Mother's Day! We are hoping for better & warmer days within the upcoming weeks!

The students were busy this month with a number of events. They celebrated International European Day and learned a lot about Spain. They enjoyed learning about famous people and traditional food in Spain. We focused on learning about Spain through videos and class projects. The students also learned about Mother's Day and

enjoyed preparing small surprises for to show their love and appreciation to their moms!

This month the students focused on identifying sight words, reading sentences and using punctuation in their writing. I am so proud of the great effort all the children have put in when completing these exercises. I can see their confidence growing daily when it comes to spelling and reading activities.

In Math, the students have been learning all about 2D shapes. We looked at the

properties of various shapes and learned to count the sides & corners of each shape. The students enjoyed making animal crafts using 2D shapes!

In Science, the students continued to learn about the human body through songs and games. The students enjoyed playing the game 'Simon Says' using all the body parts.

Happy Learning!
Mrs.Sandra

Pictures, pictures, pictures!

IMPORTANT DATES:

Parent- Teacher Meetings- 13 June

Corpus Christi (Day Off)- 16 June

End of School Year- 24 June
