

# September

## Grade 3 Newsletter – September 2022 in Review

Introduction... Welcome to another wonderful year of learning and growing together! I am thrilled to be teaching this Grade 3 class this year!

In English Language, we are using our Cornerstone Reading materials to improve our reading and understanding of English. Our spelling words each week will come from the key words and the academic words for the story we are reading. We are also using Kids A-Z for reading practice again this year. Kids A-Z is part of [www.readinga-z.com](http://www.readinga-z.com) and is an online reading program.

In Mathematics, we have been reviewing number

sense (writing number words, rounding numbers, estimating), along with addition and subtraction of 2-digit and 3-digit numbers.

In Social Studies, we have been reading and learning about Marie Skłodowska-Curie. This is in preparation for our Living Wax Museum project. Thank you to Hania's mom who sent me the names of three Polish women. If you have any suggestions, please them to me.

In Science, we are learning what science is and tools used by scientists. For our first science experiment, we need plastic bottles (500 ml) as we are going to

make "Elephant Toothpaste".

In Art, we have started learning about color theory: primary, secondary, and tertiary colors, warm and cool colors, and complementary colors. pictures.

Happy September!

Ms. Sue
