

Grade 8 October News

Language Arts...

Continuing spelling quizzes, writing assignment for fictional narrative (View was unlike anything I had seen), Five New Words reading, Call of the Wild chapters and questions.

Mathematics...

This month has been full of making math an engaging, yet an educationally fun subject to learn about. We have been able to put forth the effort of doing more math class competitions, along with small group work that allows students to learn not only from the teacher, but also one another.

Science...

Students have studied dominant and recessive traits, genetic crosses, predicting traits in offspring based on genetic cross, determining the likelihood of a trait occurring in offspring if the genotypes of both parents are not known. Students also study the ability to solve genetic crosses, determining what autosomes and sex chromosomes are.

History...

Students learned about the Holocaust, Polish Underground and Warsaw Uprising. They are researching the consequences of the war and creating poster presentations about: Germany, Japan, the Korean War, NATO and the Warsaw Pact.
