

# Grade 5 December News

## Language Arts...

I know what you're asking! How did I travel the world and end up with the best 5th grade English class on the planet? Just lucky, I guess! During our time together, we worked on grammar, writing, reading, and spelling quizzes. Though they worry a lot, they really are great and active participants in class! Have a good break!

## Mathematics...

Students have been mastering long division. They have now started to direct their attention towards Perimeter and Area.

## Science...

We worked on the protist and fungi kingdom. We turned in our first homework assignment, and copied notes into graphic organizers in our notebooks.

## History...

We finished working on our projects and presented about: Byzantium, the Slavs, the Carolingian State, the rise of Islam, and the New Nations of the West. Students also began looking at Feudalism and the parts of a Medieval Village.
