

# Grade 6 December News

## Language Arts...

Students have eagerly finished the second novel for the semester. They have also read through quite a large part of the third unit in their Keystone books. We were able to focus on biographical texts and examining the impact of historic figures on our world today.

We have also continued to review grammar topics and work on group writing assignments.

## Mathematics...

Students have continued to push through their CCC books and make great progress with their quick mathematical ability to find solutions to problems.

## Science...

They did a great job on their foldables covering the different kinds of bugs in the world by classifying them by their legs.

They are active participants in class!

## History...

We started off the month with some background on residential schools in Canada and then moved right in to Polish history.

We looked at: the Cossack Uprising, the Polish-Swedish War, the Crisis in Poland and the war with Turkey.
