

# Grade 4 January News

## Language Arts

Students have been able to read and digest various stories and novels this month. This has allowed them to learn new vocabulary and grammatical concepts. Synonyms and antonyms have also been a new introduction to the language arts lessons.

## Mathematics...

Students have been able to grasp and master the concepts of perimeter and area. This also goes for multiplication and division.

## Science...

Students worked on a pop up pyramid in their journals to understand the food web a little better. They are now working on the human body after exploring the food pyramid.

## History...

We are starting off the new calendar year with some history about Polish General Kosciuszko and Napoleon Bonaparte. We learned a little bit about the January Uprising and famous Polish scientist Marie Skłodowska-Curie.
