

Grade 5 January News

Language Arts...

Students worked on their first long essays and spent time in the technology lab writing their final drafts. They worked on typing skills, grammar, and finished the novel called "Findle". The class culture now works very well on assignments.

Mathematics...

Students have been learning and understanding Perimeter and Area. Learning how to use various formulas to solve the exact same types of problems.

Science...

Students worked on protists, fungi, lichens, and are now working on the different structures of plants. They make great observations on adaptations of organisms, along with connections concerning the differences between plant and animal cells.

History...

The new calendar year brings new activities in history class. Students are working together in groups to create a city plan for a Medieval City that includes: a main square, city walls, city hall, town church, towers, gateway, moat, townhouses, barbican, and a pillory.
