

Grade 8 January News

Language Arts...

Students are working on a literary magazine to publish for the school about a mysterious bug that invades the classroom on different days. Each student has a unique take on how this happens, and I can't wait to share it with you. We're also working on grammar connections with their workbooks and recently finished a legend.

Mathematics...

Students have been becoming accustomed to the use of more English words and vocabulary in the mathematical sense.

Science...

Students explored evolution, ecological niche, and will be going into ecology. Future goals include population, chaos theory, ecological responsibility, etc.

History...

Students were busy at work at another group project. This time we looked at: the Cuban Missile Crisis, Vietnam War, the space race, and European integration. Students practiced their presentation skills.
