

Grade 4 March News

Language Arts...

Students have been introduced to fables and other similar genres in reading. We have also been extremely focused on using the newly learned vocabulary that we have, along with doing mock Spelling Bee contests within the classroom.

Mathematics...

Students have been tackling the concept of fractions and finding the greatest common factors between two numbers.

Being able to simplify much larger problems has been this month's goal.

Science...

Students had a great time this month with the science project, where they tasted frozen biscuits and smashed frozen roses. We are wrapping up a section on dangerous situations, disasters, addictions, and first aid.

History...

Students learned about some of the heroes of the Warsaw Uprising. We also looked at Pope John Paul the Second and his role in the fall of communism in Poland. Students began studying Ancient Egypt: the pyramids and hieroglyphs.
