

# Grade 5 March News

## Language Arts...

Students had a great month of activities and performed very well. The Biome projects were a success, and they even did well going outside to learn pronouns. We are almost finished with "The Indian in the Cupboard" and will be looking into a book called "The One and Only Ivan" soon. We will be finishing with Unit 4 on the environment just before Easter. Congrats to Marek for his progression to the Spelling Bee Competition! Good luck!

## Mathematics...

Students have been learning much about financial literacy through one of Mr. Stock's reward systems known as "Stock Bucks." Learning how inflation works, how to save money, spend money, and to critically think about whether or not something is worth it.

## Science...

Students had a really good time building boxes for honey and splitting rocks during the project. During the month, students learned inquiry, mosses, ferns, and reproductive plants like pine trees and flowers.

## History...

Students have been learning a lot about key players of Poland's past. We studied about Boleslaw Chrobry and the fall and recovery of the Piast Dynasty. We looked at the rule of Boleslaw Krzywousty and life in Poland under the Piasts.
