

Grade 3 Newsletter – April 2023 in Review

Introduction... Spring has arrived! So that means you don't know what the weather will be like. 😊

In English Language, we have been working on many things. We spent time preparing for the English-Speaking Contest and using the CCC book for reading and language lessons. Congratulations to the top three speakers: Tosia, Łucja, and Hania. Tosia will represent our class in the school competition on May 15, 2023.

In Mathematics, we completed our unit on Patterning. The students took a quiz on patterning, and everyone did a good job on the quiz! We have started learning about Algebra – what

are expressions and equations and how to write them.

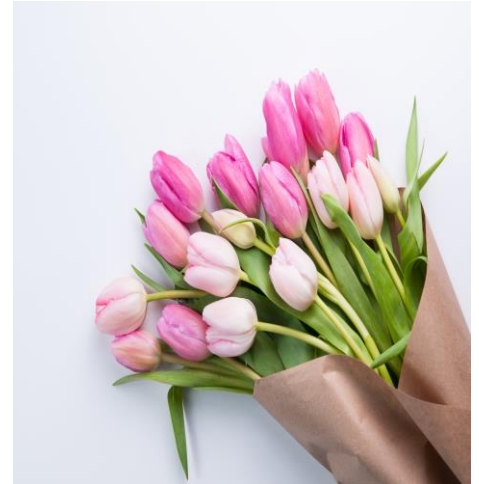

In Social Studies, we continued to learn about Canada, its unique geography and the impact of people on the environment.

In Science, we continued learning about Force and Motion. When we return from the May 1-3 break, the students will begin work on a culminating task – Design a Racecar.

In Art, we learned about Ted Harrison and created a watercolor painting in the style of Mr. Harrison.

Happy April!

Ms. Sue
