

Grade 5 April News

Language Arts...

Students completed a very successful time of presentations. As a class, we visited NASA, outer space, the Salt Mines, sports, authors, religions, and many different kinds of insects and animals. In May, we will be finishing the Unit on sounds and music, exploring literary pieces that coincide with the topic, as well as beginning a new book, "The One and Only Ivan" by Katherine Applegate.

Mathematics...

Students have been working on making great progress in their CCC Books. For a while we decided to move away from the CCC book and focus on other tasks, however this month, we have decided to return to it and make the most of it.

Science...

Students are working on different kinds of plants and how they reproduce: mosses, ferns, conifers, and flowering plants. The topic goes well with Spring and seeing the forest change outside the windows.

History...

During this month, students have been looking at the different Canadian Provinces and Territories. They are creating information sheets and presenting those to the class.
