

Grade 8 April News

Language Arts...

Students are finishing speeches, though they show more interest in enjoying the time they have together as a group and even reading "The Hunger Games" by Suzanne Collins. We recently finished a Unit involving poetry and will be moving into a section on the human spirit. Hopefully, the upcoming break will help the students rejuvenate on their sense of purpose once their time at the International School closes. It has been a joy working with this group of colorful personalities.

Mathematics...

Students have used both the CCC book and other worksheets that have been mostly focused on comparing the values of decimals.

Science...

Students are working on ecology, while taking the time to participate in field lessons in the forest, predicting future changes to an environment, and adding a little personal creativity to their responses.

History...

Students have been working in groups on the "Road to Freedom" projects covering the revolutions and democratic routes of: Bulgaria, Czech Republic and Slovakia, Hungary, Romania, and Ukraine.
