

Grade 6 May News

Language Arts...

Students are looking to the future, as we began our last unit in the Keystone books focused on "What is your vision for life in the Future?" We have completed our last spelling quiz for the school year and did our best in the Speaking Contest. We have also finished the last required reading novel, "Danny and the Champion of the World". We finished up the month with a few art lessons that contributed to the curriculum.

Mathematics...

Students are becoming prepared for the next school year in a math sense. They are polishing up their skills and becoming ready for what the next grade level has to offer for them.

Science...

Students finished their reptile projects and are continuing into learning about the characteristics of birds as invertebrates. Students will share three birds they've researched with the class in the coming weeks.

History...

Students have worked on group PowerPoint presentations about Napoleon and his life, specifically: his expedition to Egypt, the Battle of Austerlitz, reforms, and the Polish Legions in Italy.
