

# Grade 7 April News

## Language Arts...

Students began Unit 5 in the Keystone books and have begun looking at exploration and navigating through new and old frontiers. Our class Speaking Contest winners competed against other schools in the final and took home first place. We continue to look at vocabulary, grammar and have just recently finished our last spelling quiz.

## Mathematics...

Students have been becoming mathematically engaged via group math activities. They have also been given more time to finish up their CCC books before the year comes to an end.

## Science...

Students continued into the workings of the human body by demonstrating learning of the urinary system, nervous system, and an introduction to vision.

## History...

Students were able to focus on Polish history, specifically about the March Constitution, authoritative rule in the 1920s-30s, life in between the world wars and the economy of Poland at the time.
