

Grade 4 September Newsletter

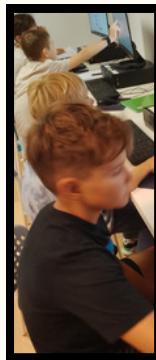

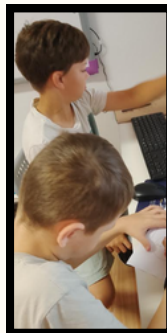

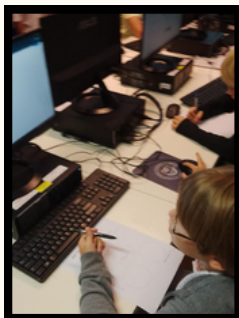

Language Arts...

In Language Arts, we have read various informational texts regarding animals and humans taking care of their young. This has led us to do our own research on animals based on our interest while using a word web. The word web has helped us create our first short paragraph along with the grammar practice that we've gone over in class.

Math...

Students began the year with a short "All About Me in Numbers" Project to review simple equations. We are currently practicing multiplication of 3-digit and 2-digit numbers by 1-digit numbers.

Science...

We have been learning about the use of geographical (cardinal) directions, which countries are in the west, south, north and eastern part of the world. We have also been learning about the use of 5 senses within Nature, what we can see, smell, touch and hear.

History...

We are very excited to start the new academic year and we began our semester with some fundamental knowledge of history. We looked at different historical sources, how historians find information about the past, and the timeline of history.
