

Grade 7 October Newsletter

Language Arts...

Students are working diligently to tackle many different tasks. We are in the middle of our novel. We interviewed and wrote short biographies about our classmates. We began working on the second unit in the Keystone books, we read a part of The Odyssey and looked at rewriting a story from a different point of view.

Math...

Students are continuing into the next unit and tackling all different types of integers. We played integer football and created posters answering all types of integer word problems. We also reviewed perimeter and area.

Science...

Grade 7 have learnt a lot about the structure and functions of the skeletal system. The students did a really good job memorising the names of different joints, and bones in the human body.

History...

Students worked on the second project of the semester, a webpage. They researched the Kingdom of Poland, November Uprising, Great Emigration, Prussian and Austrian Partitions, as well as the Polish situation after the uprisings.
