

Grade 4 December Newsletter

Language Arts...

Grade 4 has been in the holiday spirit and this month they learned to whip up their own original Christmas dessert recipe for their final project of the year. Their project was in media form and their creativity was shown through their presentations. Students were also quite clever at writing their riddles and jokes for parents as we sure got some memorable laughs together.

Math...

Students took a few lessons this month to practice multi-digit multiplication problems. We are also finishing up our divisibility rules and reviewing multiplication facts.

Science...

The students have been learning about different types of organisms. Organisms that live on land and in the ocean. They now know the diet of most animals, as in which animals are carnivores (that eat meat) and which animals are herbivores (that eat plants).

History...

Students took part in a few different field trips this month during Thursday classes, but we were able to learn a bit about castles and medieval knights as well as Casimir the Great of Poland.
