

# Grade 7 December Newsletter

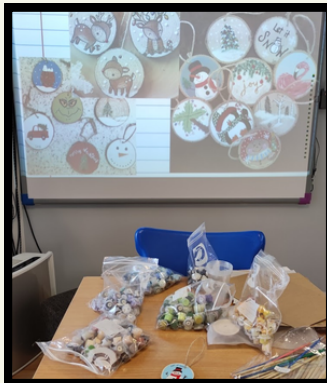

## Language Arts...

Students began the month with reviewing informal letter writing. We finished up the unit and began practicing our speaking project. Students were able to retell a story in front of the class. We read several short stories that focused on different successful people and completed reading comprehension questions.

## Math...

Students continued working on projects that show understanding of fractions and decimals. They worked with improper fractions and completed several puzzles in groups and individually.

## Science...

This month the students have learnt about the urinary system and the respiratory system, how to stay healthy and prevent diseases from occurring. They also learnt about the different types of diseases in the urinary system and the respiratory system.

## History...

Students completed comics about inventions of the turn of the 19th and 20th centuries. They researched, created and presented their work to others. They learned about Germanization and Russian influence in Poland taking notes and summarizing work.
