

December

Grade 2 Newsletter – December in Review

Introduction... With the upcoming holidays, December has been crazy packed busy for Grade 2 students. The children have excitedly completed their first class project which is creating a board game. what better way to bring friends and family together?

In English Language, we focused on reading and writing poems. Students also did a Show-and-Tell Presentation, however, they had to present with a poem they wrote about what they're showing.

In Science, the children learned to differentiate solid, liquid, and gas. We also did a Christmas science experiment dissolving candy canes in 4 different types of liquid and recorded our hypothesis along with the ending results.

In Social Studies, we briefly read about special holidays in Canada such as Remembrance Day and Canada Day. Other than knowing Christmas is in December, we also learned about Kwanzaa.

In Mathematics, students studied very hard for their first math quiz on addition, subtraction, and rounding numbers. We're now learning about perimeters and area with designing Christmas pictures on a grid and calculating the perimeter and area.

In Art, the children have been super crafty this month with the holidays coming up. Students did a winter theme painting, 3D snowflake, and a couple of surprise gifts for parents!

Happy December!
Miss. Jen

IMPORTANT DATES:
