

Grade 7 January Newsletter

Language Arts...

Students illustrated extended metaphors and have been looking at other literary devices that authors use. We are finishing up the second reading of the third unit, which focuses on poetry. We looked at poems that deal with success and failure and wrote short persuasive essays about MLK Jr. and the ideas of segregation.

Math...

Students played a jeopardy game to finish the unit on percentages, decimals, and fractions. We played a snake game to review multiplication of fractions. We created geometric snowflakes and calculated areas of different shapes.

Science...

The students have been learning about the nervous system and the visual system. They also learned about health and wellness of the visual system and how the millions of neurons in our brain help us to function.

History...

Students began poster projects about the First World War. Topics include: before the war, war technology, war on the western front, war on the eastern front, and the end of the war and its effects. Students will be working in groups to research and create presentations.
