

Grade 7 February Newsletter

Language Arts...

This month has passed quickly. We read a short story by Gary Soto which inspired us to hold our own Marble Championships in class. We have been diligently preparing for our class and school Spelling Bee. We wrote short notes about people that we love and continued writing this month by creating a short newsletter article.

Math...

Students began a new unit on algebraic expressions. Students have looked at finding variables and balancing equations. We played jeopardy games, equation basketball and even took turns teaching topics in class in order to practice these skills.

Science...

The students have learnt a lot about the different types of hormones. They have learnt how they play an important part in the development, function and growth of the human body.

History...

Students presented their poster projects to the class. Students also learned about the freedom of Poland in 1918, The Paris Peace Treaty, and the effects of the war. Students learned about several important historical figures like Pilsudski, Dymowski and Daszynski.
