

Grade 8 February Newsletter

Language Arts...

This month has been filled with lots of work. Students have been diligently practicing for the Spelling Bee contest in March. Students read a legend and write one of their own. They also created an AI image to accompany their text. We worked on several grammar concepts including relative pronouns and transitions.

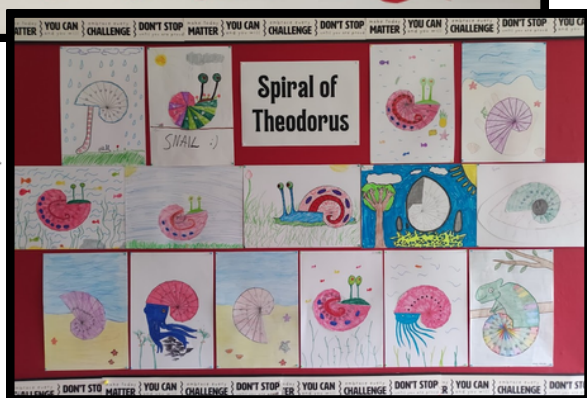

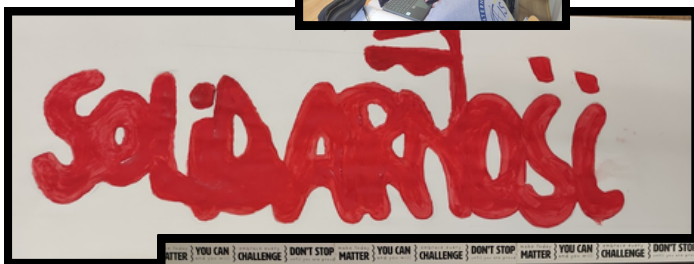

Math...

Students worked with the Pythagorean theorem to calculate different sides of right triangles. We completed an art project called the Spiral of Theodorus and showed that math is present everywhere. We also began a new unit covering areas.

Science...

The students have been learning about Ecology and how important it is to understand the characteristics, temperature and conditions of animals as well as humans in different environments.

History...

Students worked on creating short comics online to represent a short history of Poland from time to Gomolka to Gierek. They will also be putting together an exhibition on the Solidarity movement in Poland with banners, brochures and posters.
