

Grade 5 March Newsletter

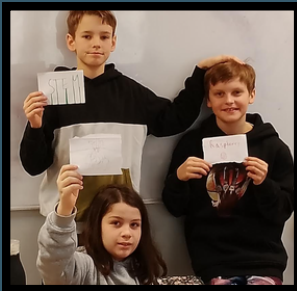

Language Arts...

The students have been learning about different types of marine organisms, how they survive and about their habitats. They have also been preparing a presentation on individual animals and their characteristics. They should be presenting their research work to the class next month.

Math...

This month started off with lots of measurements and finding the averages of different lengths. Students also looked at the area and perimeter of shapes, starting with squares and rectangles.

Science...

The students have been learning about different stem transformations. They also did a short role play on the structure and photosynthesis of a plant. Non-flowering plants as well as plants that grow fruits.

History...

Students learned the hard work that scribes had to undertake in the past by using calligraphy and creating a wax seal. They also learned about the Imperial-Papal Conflict, the Crusades, and the Birth of the Polish State.
