

Grade 6 March Newsletter

Language Arts...

A student came 2nd place in the spelling bee contest! So now students are motivated and excited to get back to their weekly spelling quizzes, as well as using 4-5 syllable adverbs and conjunctions in their sentences. They also recently did a play in class titled 'The Secret Garden' which they enjoyed.

Math...

Students began a new unit on surface area and volume. We began with creating 3D shapes from toothpicks and clay and then constructed our own 3D town. Students used this to practice finding surface area and creating houses from their nets. We also had a Pi Day treat.

Science...

Grade 6 have recently finished doing their presentations on invertebrates, it took them a few weeks to prepare and a couple weeks for all the students to present their findings. We are now looking at the structure of different fish organisms and how they survive in their water environment.

History...

Students worked in groups to complete a brochure assignment about different parts of the American Revolution. Groups read about the Founding Fathers, the Three Branches of Government, the reasons for Revolution, the course of the war, and the colonies.
