

# April

## Grade \_ Newsletter – April in Review

April has been very eventful for Grade 2 and they did phenomenal on this year's Speaking Contest!

In English Language, students finished reading *Aliens for Breakfast* and made comics of each chapter! Recently they learned some new and old words for senses which they'll soon use to write a paragraph.

In Mathematics, students learned many new things such and did some more practice with word problems. This month they were introduced to fractions, capacity, and mass.

In Social Studies, we learned the various basic needs of different countries around the world. We compared to how people live in their own countries with how we live in our country.

In Science, we've been extremely hands-on with building a water wheel. We also visited The Science Museum and made continuous sounds with random objects whilst working in teams.

In Art, we finished drawing optical illusions that has surely tricked our eyes. Now we've moved on to drawing with oil pastels.

Happy April!

Miss Jen
