

# Grade 6 April Newsletter

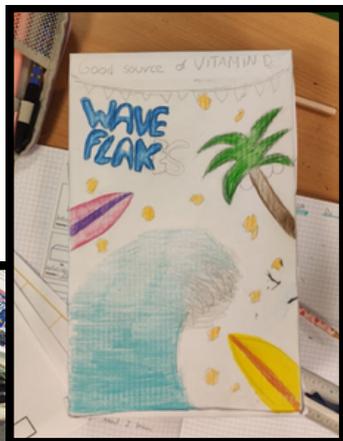

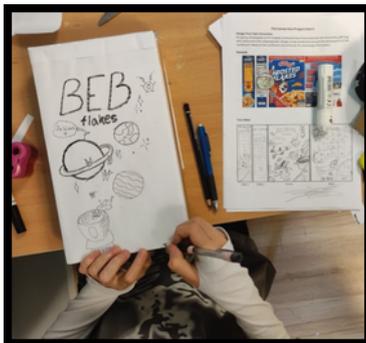

## Language Arts...

The students have been learning about augmented reality and how life would be in the future. They have written short essays describing how different they think life would be and also read two stories in class about life in the future. The students have also been practicing really hard for their speaking contest.

## Math...

Students learned about the volume of 3D shapes and worked to complete the cereal box project. They were tasked with finding surface area, volume, unit price, and other totals. They created their own cereal brands and illustrated cereal boxes.

## Science...

They have been learning about the different characteristics of amphibians. How they survive, their daily food consumption and reproduction stage. The students also did a book design recently that looked very good.

## History...

Students created Google Slide presentations about 18th century Poland. They researched: the reign of the Saxons and anarchy in Poland, the First Partition of Poland, Stanisław August Poniatowski and his achievements, the May Third Constitution and the Second Partition.
