

Grade 7 April Newsletter

Language Arts...

Students worked on preparing for the Speaking Contest both as individual contestants and groups of up to five. We practiced our writing through opinion essays, recommending a book, movie or novel. We finished up the second novel of the semester, *A Wrinkle in Time* and we continue to work on grammar and spelling skills.

Math...

Students completed the Locker Problem and used powers and square roots to solve real world questions. They are currently creating a review Jeopardy game that covers the different topics that we worked with this year in math class.

Science...

Grade 7 students have been learning about the peripheral nervous system and the central nervous system. And also the hygiene of the nervous system, and how the body reacts to negative stress.

History...

Students created brochures about the interwar period in Poland. They learned about the March Constitution and the Polish political system, the May Coup and Józef Piłsudski, the foreign policy of the Second Polish Republic, and social and economic changes at the time.
