

# Grade 6 June Newsletter

## Language Arts...

The students enjoyed a 3 day art project, where they learnt how to create art digitally, as well write, compose and perform songs. The students have also been practicing interview role plays and have been presenting it in class.

## Math...

Students put their creative brains to the test with several math puzzles: the Domino Effect and the Checkered Box. They calculated mean, median, mode and range. They reviewed the year and reflected on their learning.

## Science...

The students have been mainly revising/recapping our lessons on Amphibians and also enjoying open class discussions on the most memorable and productive lessons.

## History...

Students completed a short review of the topics that were covered this year. They learned about a few curiosities of the 19th century. Students learned about the Watt's steam engine and how it changed the world at that time. They also heard about Samuel Morse.
