

# Grade 8 June Newsletter

## Language Arts...

Students participated in a few field trips during the last few weeks of school. They got ready for the primary school graduation ceremony. They were able to reflect upon their learning this year and the past eight years. They wrote emails to their future selves and set goals for the summer and for their next school year. Good Luck!

## Math...

Students reviewed the concepts that they have learned in math this year. They also calculated the measures of central tendency, including mean, median, mode, and range. They worked in groups and individually.

## Science...

The art project was amazing. The students had created some amazing art pieces. We have also been going over lessons on biodiversity and how important it is to our planet.

## History...

Students reflected on their learning this year and the topics that were covered. They viewed several documentaries about the Space Race and about Machines of War. They were able to learn more about topics that interested them.
