

Grade 4 Newsletter - May in Review

Language Arts

Grade 4 has had a great month! They've been doing a lot of note taking and reviewing stories in their Student Edition. The students have also been working in pairs and creating conversations using different idioms and English expressions.

Mathematics

Students have finished graphing the results of their surveys and data sets. They used a protractor and looked at creating pie charts. They also showed their creativity and knowledge of measurement and geometry in order to create mazes and labyrinths.

Science

Students worked on creative stop-motion videos to show what they've learned about dinosaurs. They used a range of materials and had the freedom to design their own approach. The activity encouraged both scientific thinking and creativity.

Pictures, pictures, pictures!

History

Students have looked at creating posters about the Achievements of Ancient China. They researched topics like: the Great Wall of China, the Terracotta Army, the History of Silk, the Invention of Gunpowder and the Invention of Printing
