

Grade 5 Newsletter - May in Review

Language Arts

The students had a debate discussion on what makes a country so great to visit. Each group represented their country with valid points and were very good at coming up with facts and their opinions. The students have also been reviewing stories in the Student Edition book and taking notes.

Mathematics

Students continued working on the data unit. They analyzed different information and answered comprehension questions based on charts and graphs. They also created mazes and used their creativity and knowledge of measurement and geometry.

Science

Grade 5 began learning about viruses and how they compare to living things. They studied how viruses infect cells and use them to replicate. Students started planning stop-motion videos to explain the process, which they will complete next month.

Pictures, pictures, pictures!

History

Students have worked on Google Slides presentations to help their peers understand the Beginnings of the Polish State. They worked on gathering information about: Boleslaw the Brave, Saint Adalbert, the Reign of Mieszko II, the Reconstruction of the Polish State, Boleslaw the Bold and Boleslaw Wrymouth.
