What We Learned...

January 2026

## Language Arts

Students continue to read the novel *Holes* and work on reading comprehension activities. We reviewed the differences between fact and opinion, practicing to identify one from the other. We are reading a short science text titled "Friendship and Cooperation in the Animal Kingdom" while working on placement of adjectives and identifying main ideas and details. Students have also been practicing for the Spelling Bee.

## Mathematics

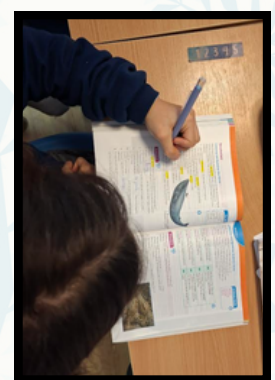

Students have been working on scale proportions on maps. They have started working on proportions and ratios as well.

## Science

Students began working on a group project. Each team will research and present information about a different group of invertebrates, explaining what they look like, where they live, and how they impact human life.

## History

Students wrapped up learning about Absolute Monarchy, and began studying the Glorious Revolution in England that happened near the end of that time period.

Happy  
New Year!
