What We Learned...

March 2026

## Language Arts

Students have been working on completing unit four in the Keystone books. They finished up the summative activities and worked on reviewing the big question. Students watched the film *Holes* and compared it to the novel they finished reading. We also started the new novel "A Tale Dark and Grimm". We are reading it in class and completing comprehension and vocabulary tasks. They have also participated in the class Spelling Bee and worked on writing an original fable.

## Mathematics

Students wrapped up their unit on writing algebraic expressions. They have been working on simplifying expressions containing multiple variables and exponents.

## Science

We finished our unit on arthropods with an identification activity. Students examined models and, based on the number of legs, antennae, and body segments, classified them as crustaceans, insects or arachnids.

## History

Students wrapped up the Enlightenment period, and have been learning about the Age of Revolution. They learned about the American Revolutionary War, and how it affects US policies today. In addition, they started learning about the French Revolution.
